12:00 – 13:00: Panel Discussion: **Economic Growth through Diversification and Competitive Supply Market.**

*The global pandemic in 2020 and the oil price crisis ensured the world re-examined dependency on certain industries and the security of supply. With a renewed focus on understanding the importance of having a diversified economy and reliable/competitive supply market in private sectors, what does this mean for Suriname? What lessons have been learned, what are the developments in this space, what are the opportunities for nearshoring, and what are the benefits of creating diverse and resilient supply chains? What can or should be done in Suriname to help grow supply chains for the benefit of the energy, oil, and gas sectors, and what supporting infrastructure projects and developments are required to improve local supply chains?*

12:15 – 13:00: Panel Discussion: **Fostering Entrepreneurship and Innovation in Suriname**

*Suriname stands at a crossroads, poised to unlock its full economic potential through fostering entrepreneurship and innovation. Despite a vibrant start-up scene in Paramaribo, the country faces significant challenges of fragmented initiatives, and a risk-averse culture. However, there is hope on the horizon. By addressing these obstacles head-on and embracing initiatives which provide access to digitalisation and advanced manufacturing technologies, we can empower entrepreneurs, drive economic growth, and strengthen the innovation ecosystem. Through collaboration, investment, and a shared vision for the future, Suriname can chart a path towards prosperity, leveraging its rich cultural heritage and entrepreneurial spirit to create a thriving economy for generations to come.*

14:40 – 15:30: Panel Discussion: **Industry Standards and Supplier Development**

*This panel discussion will address why the oil and gas industry has such high standards and the need for qualified suppliers. The discussion will highlight the importance of strengthening supplier capabilities, the minimum requirements suppliers need to meet to compete for business opportunities, the expectations from buyers, and how they run their procurement process. Key industry stakeholders share their views on the potential benefits, challenges, and strategies for supplier development and creating shared value in the energy sector while addressing opportunities for partnerships and regional integration that will help efficiency and boost the competitiveness of service companies working across this space. Increased supplier competitiveness and meeting the highest industry standards will foster the value retained in local economies from the spending of the major operating companies.*
